Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2001.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

An attempt for provisional restriction requirement was made on Tuesday, December 7, 2004 with Applicant's Attorney, Paul Skwierawski (703-312-6600). See interview summary attached. Applicant is reminded that election for one of the groups and cancellation of nonelected claims is requested in response to this action.

Restrictions to one of the following inventions is required under 35 USC 121:

- I. Claims 1-5, drawn to a method for generating operation codes comprising a plurality of encoded code words, eliminating portion of the code words and determining a hamming distance between the selected encoded code words, classified in class 714, subclass 777.
- II. Claims 6-21, drawn to an method for transmitting and receiving a packet of information comprising the generation of syndrome values in the encoding and decoding process, classified in class 714, subclass 793.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, drawn to a method for generating operation codes comprising a plurality of encoded code words, eliminating portion of the code words and determining a hamming distance between the selected encoded code words and Group II, drawn to an method for transmitting and receiving a packet of information comprising the generation of syndrome values in the encoding and decoding process as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 2133

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims of Group I do not require the limitations a method for transmitting and receiving a packet of information comprising the generation of syndrome values in the encoding and decoding process. The subcombination has separate utility such as in a single networked environment.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Any inquiries concerning this communication should be directed to the examiner, Mujtaba Chaudry who may be reached at 571-272-3817. The examiner may normally be reached Mon – Thur 6:30 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, please contact the examiner's supervisor, Albert DeCady at 571-272-3819.
